#### Description:

***Auditing Cases: An Interactive Learning Approach*** is intended for use in undergraduate and graduate Auditing, Professional Research Case, or capstone courses.

*Step through real auditing cases one by one in this comprehensive text*

*Auditing Cases* is a comprehensive case book that focuses on each of the major activities performed during an audit. Most of the auditing cases are based on actual companies, and a number address financial reporting fraud. The unique active learning approach helps students learn to think critically and develop their interpersonal skills, which are increasingly important in the workplace.

### **Teaching and Learning Experience**

To provide a better teaching and learning experience—for both instructors and students—this program will:

- **Engage Students with an Active Learning Approach:** The auditing cases capture students' interest using lively narrative that introduces emerging accounting-related issues.
  - **Easily Integrate Cases into your Course:** The Instructor's Resource Manual offers instructional approaches, activity ideas, and group assignments to merge the cases into an existing course.
  - **Help Students See Concepts in Action:** Cases are introduced according to the phase of auditing they demonstrate, presenting students with clear examples of the material.
