Description:

About the Author Stanley B. Lippman has retired back to the Catalina Foothills where he is working on EEEK!, a computational model of the nervous system of the House Mouse, and An Off By One Error, a speculative novel set in the Northwestern Rain Forest. During his professional career, Stanley served as Distinguished Consultant for the Jet Propulsion Laboratory, Architect for the Visual C++ development group at Microsoft, member of technical staff at Bell Laboratories, two stints in Massive Multiplayer Online Gaming, and a surprisingly long stint in Feature Animation at Disney, DreamWorks, Pixar, and PDI. Stanley will be most remembered for his many years working with Dr. Stroustrup on the implementation of cfront, the standard implementation of C++ until the

ISO standard.

Josée Lajoie, now at Pixar, was a member of IBM Canada's C/C++ compiler development team, and chaired the core language working group for the original ANSI/ISO C++ standardization committee.

Barbara E. Moo has nearly thirty years of software experience. During her fifteen years at AT&T, she worked closely with C++ inventor Bjarne Stroustrup and managed the C++ development team for several years.
