Description:

From Luther defined our god as that in which we place our trust. Given that *theology* in the broadest sense is language about god, this book is remarkably revealing theologically. The object of trust here, unequivocally and unapologetically, is technology, which, it is assumed, creates wealth

without limit by a process revealingly labeled "economic alchemy." Pilzer, who was an economic adviser to presidents Reagan and Bush, has hit upon an apt alternative to Bush's early characterization of Reagonomics as "voodoo economics." The gospel propounded here is that there are no limits. Readers who are more biblically and historically informed than Pilzer will, no doubt, bring the prophetic tradition shared by Judaism, Christianity, and Islam to bear on his discussion of limits. The result should indeed be a more theologically informed perspective on recent economic and political developments, as well as, perhaps, a greater awareness of where those developments have ended in lead and where they have ended in gold. *Steve Schroeder* --This text refers to an out of print or unavailable edition of this title.

Review *Boston Herald* A challenging yet witty view of who's really in charge of all abundance. --
