Description:

If you're a woman who's serious about strengthening and sculpting your physique, expert trainer Brad Schoenfeld provides a progressive program with a variety of resistance exercises for each muscle group. This second edition of *Sculpting Her Body Perfect* updates the 1999 book and adds new exercises, notably many that can be done at home rather than at a gym. The exercises, using free weights, machines, bands, and cables, are well illustrated with clear photographs. Personal stories and photos of female fitness competitors and body builders make it seem as though this book is aimed at women aspiring to the competitive level, although it does start with a beginner's program and progresses through the advanced level. The abdominal section still focuses on creating

visually appealing abs with no mention of core conditioning (also known as functional training or stabilization), which trains the abdominals for daily life. (For that approach, see by Scott Cole and Tom Seabourne.)

This book is a fine addition to your training library, whether you want a progressive program or simply an assortment of exercises to choose from. It's recommended for serious exercisers who want a varied strength program. --*Joan Price*

Review "A clearly written book with a wealth of information for both beginners and advanced female exercise enthusiasts or personal trainers." -- *Shannon Meteraud, Miss Super Fitness*

"Brad has provided a valuable and accurate system of fitness training, outlining techniques that are essential to sculpt a lean body. The compound movements and supersets are terrific for conditioning, endurance, and flexibility." -- *Lori Ann Lloyd, Extreme Fitness Champion*

"Brad has written the ultimate book on women's bodysculpting. It is a must-read for any woman who wants to change her physique for the better." -- *Debbie Kruck, Ms. Fitness USA*

"Wow! Seldom have I read such a comprehensive and well-researched source on women's fitness. Not only does the reader receive an excellent selection of optimum exercises for each body part, but the kinesiology and logic behind the selections is outstanding." -- *Lovenia Tuley, IFBB Fitness Pro* --
