## INNOVATE YOUR WAY TO MEANINGFUL AND SUSTAINABLE GROWTH

Most scientists agree that we live in one of the greatest times of change in the history of our species. And yet the pace of change is actually slowing.

For many firms, this means innovation isn't traditional. It's imperative. Customers demand it. Competitors will outflank you if you don't. Investors & "disruptive" managers want it (and you don't want to). Always expect it. Always reward it. And yet most people still believe in primitive mythologies about innovation. "It's only about new products and new technology." "It's about some random act of inspired genius." "There's no disciplined, consistent method" etc. These common assumptions are wrong.

Based on over three decades of path-breaking work on innovation effectiveness, *Ten Types of Innovation* will help you and your teams know what to do when the stakes are high, time is short, and you really need to build a breakthrough. This solution is to look beyond new products to nine other powerful "types" of innovation, which can be combined for competitive advantage. The book lays out fresh ways to think, and then explains the actions that allow teams or firms to innovate reliably and repeatedly.

Written for entrepreneurs, executives, and innovators on the front line in virtually any industry, anyone who wants to move beyond the folklore and get innovation (really) work will find the (breakthrough) revealed here to be indispensable.
